Teacher Lesson Plan

Session Name:

Identity

Summary:

When the Internet was created, the developers had no idea of the direction it would take. The Internet we use today is very different from earlier versions. Therefore, the Internet is fundamentally insecure, which also changes how we manage and secure our real identity. Your real identity and online identity may be vulnerable to outside sources. However, there are some simple things you can do to protect yourself and your information.

Time Allotment:

75 minutes

Learning Objectives:

- Define Identity (Personal & Virtual)
- Identity Theft
- Explore common online phishing Scams
- How to secure your Identity

Supplies:

- Scrap paper / notepad to take notes

- (15 minutes) Virtual Identity
 - Internet identity or Internet persona is a social identity that an Internet user establishes in online communities and websites. It can also be considered as an actively constructed presentation of oneself. Although some people choose to use their real names online, some Internet users prefer to be anonymous, identifying themselves by means of pseudonyms, which reveal varying amounts of personally identifiable information. An online identity may even be determined by a user's relationship to a certain social group they are a part of online. Some can even be deceptive about their identity.
 - Some examples include:

Instagram username

Email account

Twitter handle

SnapChat account name

XBOX / PlayStation. GamerTag
